undevid.github.io/Portfolio/en Turin, Italy

PROFILE

Senior Android Developer based in Turin, Italy. I started in 2016 with Java and today I work with Kotlin and Jetpack Compose, as a consultant and freelancer for companies such as Reply and Accenture: digital payments, Bluetooth-connected motorbikes, publishing, tourism, banking and live sport.

I take projects from the first idea to release on the stores, with care for both architecture and design. Alongside client work I build my own apps, two of them published on Google Play.

EXPERIENCE

Synesthesia · Android Developer · freelance — Sept 2026 — Oct 2026
White-label live sport apps, driven by configuration. Kotlin · Clean Architecture

Connect Reply · Android Developer · freelance — Feb 2024 — Jul 2026
